

Assignment Feedback

QQ1a: The response demonstrates some understanding of reporting practices but lacks clarity and depth.

QQ1b: While the response touches upon the key concepts of drill-up, drill-down, and drill-through, it lacks detail.

QQ1c: The response inadequately addresses the concepts of data clustering and filtering. Data clustering is not explained, and filtering is only mentioned in passing.

QQ3a: The response provides a decent overview of the need for data preprocessing but lacks depth in explaining the various techniques.

QQ4: The response demonstrates a basic understanding of data reduction but lacks depth in explaining the various techniques.

QQ5a: The response introduces logistic regression correctly but lacks a clear explanation of the underlying concepts.

QQ5b: The response distinguishes classification and clustering effectively. Provide stronger evidence to support the claims.

QQ5c: The response provides a basic description of decision trees. However, the case study lacks detail and depth.

QQ6a: The response accurately lists the advantages of BI in ERP. Expand on each advantage with specific examples.

QQ6b: The response effectively explains the role of analytics in BI. Provide more details on the various types of analytics.

QQ6c: The response adequately defines WEKA and RapidMiner. Elaborate on their functionalities, strengths, and weaknesses.
